High-efficiency waste heat units and SPI accessories

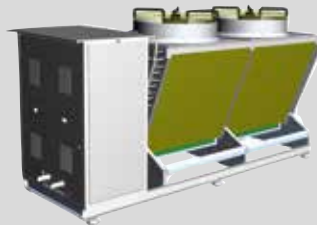

High-efficiency AHT waste heat units

With the SPI versions of the AHT refrigerated cabinets, you can integrate these into your cooling and heating system. Connection of the SPI refrigerated cabinets to a waste heat unit allows the waste heat to be dissipated directly. As a full-range supplier, we have the right waste heat units for your requirements in our product portfolio. Our sales staff will be happy to inform you in detail about all the possibilities.

The units can be finished with an aluminium, epoxy or KTL coating. With our waste heat units, we cover the performance spectrum from 20 kW to 170 kW per circuit.

COMPACT UNIT AWE

Waste heat unit with pump station, including preparation for waste heat recovery

AWE BNE 80 kW (coated fins)

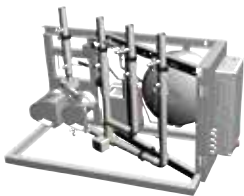

AWE BSA 100 kW (aluminium fins)

FLOOR INSTALLATION

The waste heat units are available with different sound pressure levels (dB).

SPLIT UNIT PUMP STATION & RECOOLER

Floor, wall, table, or radial installation

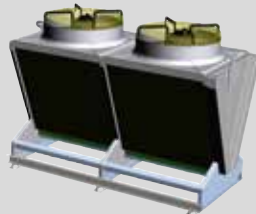

Pump station for indoor installation with recoolers for outdoor installation

Pump station for outdoor installation

FLOOR INSTALLATION

RKBNA 80 kW
(up to 170 kW available)

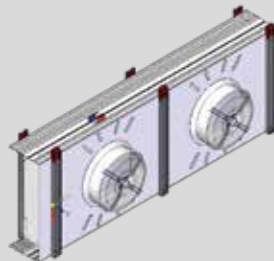

RADIAL INSTALLATION

Radial recooler

The recoolers are available with different sound pressure levels (dB).

WALL INSTALLATION

RKWNA 80 kW
(up to 170 kW available)

TABLE INSTALLATION

Tabletop recooler

The recoolers are available with different sound pressure levels (dB).

Installation

AHT project management is at your side during the planning, organisation and implementation of the installation. We accompany you step-by-step through your project and support you with our extensive know-how and experience.

SYSTEM TECHNOLOGY ACCESSORIES

Maintenance platform, glycol drip tray, repair switch and other accessories are available on request.
